HISTORY / ADDITIONAL INFORMATION

I began working as a Video Playback Operator in April 2002. Working predominately on 35mm and 16mm film shoots. Became very confident on working with all Panavision and Arri Cameras. Worked through the introduction of shooting on digital format with Sony and Panasonic cameras through to the arrival of Arri Alexa, Red Epic and Sony F55 cameras. I am very competent on all forms of Mix and Overlay, and have worked on multiple POST heavy shoots. I am a competent editor and have used most versions of FINAL CUT PRO.

I have built my own Playback (Q-TAKE) systems and currently run my own company, which provides many aspects of playback equipment for multiple cameras in many different types of locations. I carry a van full of different types and sizes of monitors, full rigging and mounting equipment, Long Distance HD Transmitters, various recorders and packages for Studio base and locational based shoots. I have also built a small portable rig with Q-Take that you can travel abroad and work in harder to reach locations.
